

# Features

## Auto Motion

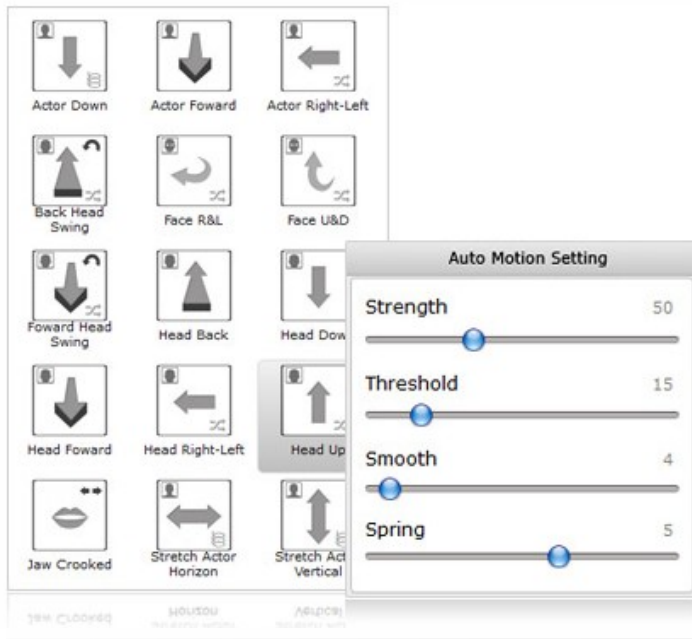

### Auto Lip-sync from Text, Audio, or even your Own Voice

- Import a WAV file or record your own voice with the built-in audio capture feature.
- Enjoy a vast phoneme databank that automatically lip-syncs to your image.
- Advancements in Text-to-Speech offer better quality for all end-users, plus additional solutions for text-driven voice performances.
- Audio support for both Morph-based and Sprite-based lip-syncing animation. [More about TTS](#)

## Audio-driven Movement

- This clever new feature analyzes the tones in your voice to automatically generate head and facial movements. You may apply different animation styles for specific voice scenarios.
- Determine how strong your actor motions are influenced by sound by adjusting the smoothness, tuning the spring effect, or constraining movements to a certain volume level.
- Using these features can help anyone create dynamic, stretch-and-squash, pop-and-bounce, and professional-looking cartoon animations in a fraction of the time.

## Matching Animation Scenarios

- CrazyTalk7 allows you to create impressive animations by matching the attitude of your voice to your character.
- These rich animation formulas are derived from classical animation principles that have been cleverly incorporated into the software to create unique style variations.
- Find inspiration in our sample edits, or search through the extensive CrazyTalk library for a gallery of animation styles.

### Sing

You can make an avatar sing an opera with a raised head, or hum the blues with expressions that are full of heartache and pain.

Ballad

Hip hop

Lullaby

Opera

Pop Music

Soul

## Talk

Let any virtual host talk with an agreeable attitude, whisper a secret, or shout with hatred!

## Fun

Use natural sounds and gestures on your character like coughing, snoring, kissing, barking, or grumbling for quick and fun results!

## Listen

Your avatars can now have natural movements while listening to a conversation, or feel terribly scorned while you yell at them.

## Dance

Make your avatar dance along with the beats like a super star! Waving, bobbing, grooving, and other funky dance moves can be applied with just a click.
