

Features

Editing Environment

Easy & Complete Editing Environment

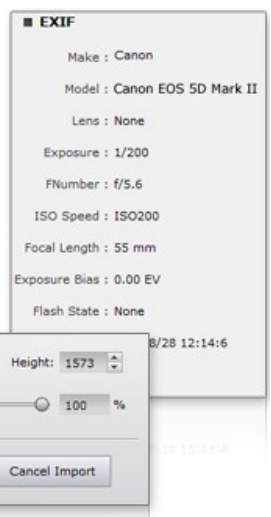

- The dock-able user interface helps you easily arrange your own custom working environment.
- One-click access to visual templates for makeover changes, facial reshaping, and post photo effects.
- Quickly switch between skin refinement, contour sculpting, or eye makeup with the Beauty Center.
- Apply further detail enhancements on any selected feature with the Modify Panel.

Lossless Editing

- Freely rescale images for optimal image processing speed.
- Support RAW image formats to retain the highest image quality. Up to 6000x6000 (PRO Only!).
- All image processing is based on your original image. No matter if it's a RAW or JPG file, there's no image degradation even after numerous project re-editing. (PRO Only!)

*We also support DNG format import. You may easily convert any RAW images into DNG files without quality loss. Try it with the free conversion tool from Adobe [here](#)

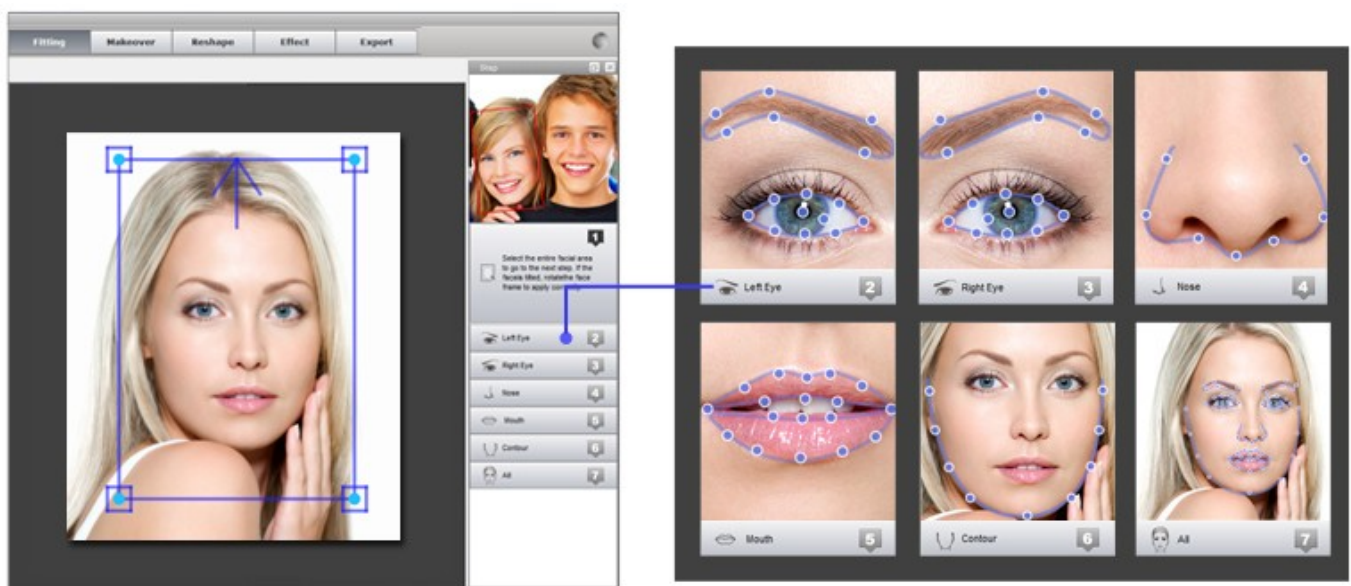

Three Different View Modes to See the Difference

- Three viewing modes to best compare your photos' before and after.
- Holding the right mouse button in the After view lets you temporarily switch to the Before view.
- The Splitter view allows you to drag the divider to compare before and after.
- With Dual view, you can see the before/after difference, side by side.
- Click to zoom the focal area.

Accurate Results with Detailed Face Fitting

- Frame-select the face, and then rotate to align with head orientation for easy makeup editing.
- Further define the fitting points for eyes, brows, nose, mouth (open or closed), and face contours.
- Redefine your brow or lip shape when applying makeup.

Over 400 Visual Templates to Change Looks

- More than 400 embedded content and 50 categories.
- Templates designed by professional studios, using real life makeup principles.
- Up to 20 layers of masking effects to achieve ultimate realism.
- Easily save custom designed templates for future use.

Visual Template Library

Advanced Enhancement Through Modify Panels

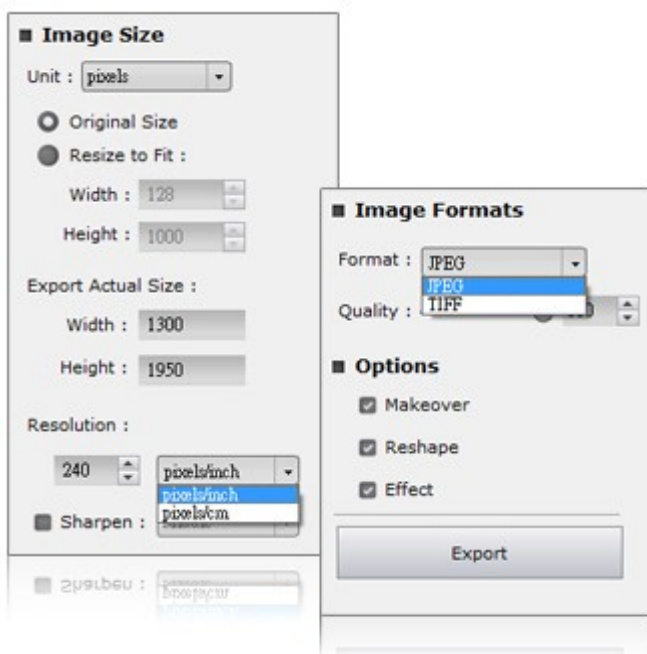

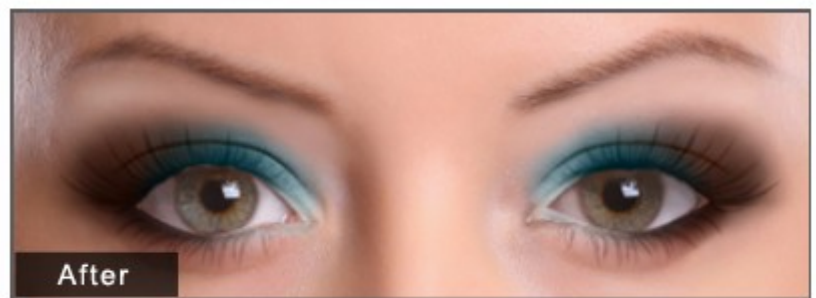

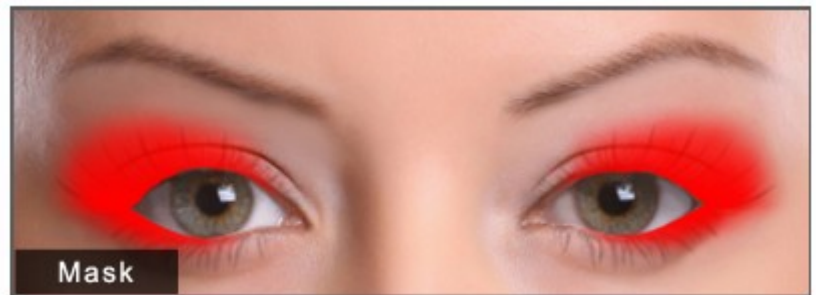

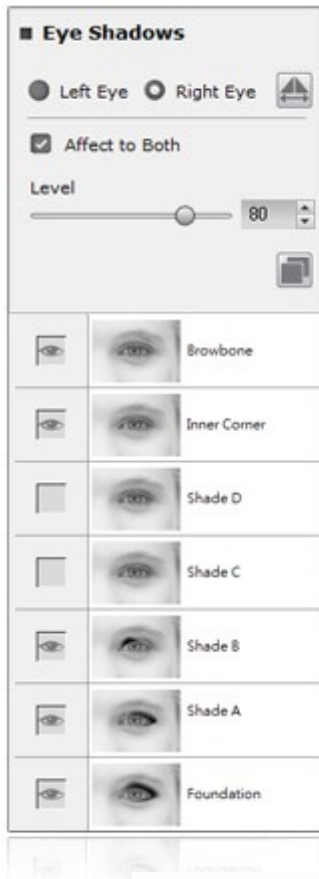

Modify Panel & Beauty Center for All Settings

- After applying each template effect, you can balance the strength inside the Beauty Center and Modify Panel.
- Toggle the On/Off feature to show, or hide the entire effect.
- Custom design and fine-tune the effect in the Modify Panel such as the palette library, color setting, texture pattern, and image layer. (PRO Only!)

Define Effect Areas with the Mask Tools & the Layer Manager

- Lasso or paint to mask your target area with custom brush size and alpha strength.
- Edge smooth or expand/shrink mask with the Feathering Tool.
- Define the foreground and background for the DOF process.
- Freely modify existing templates or custom design your own image layers.
- Up to 4 mask layers for Highlights and Contours, 3 layers for Blush, and 7 layers for Eye Shadow designs.
- Add custom image layers, or show/hide, rename, and delete selected layers.
- Custom design the makeup area for layering effects such as refining the eye shadow location, retouching the eyeliner, reshaping the blush on the cheeks, or removing blemishes. (PRO Only!)

High-resolution Image Export

- Define output size, resolution, and sharpness level.
- Export your photos as JPG with quality settings, or TIF with different bit depth.
- Export the exact size of your image with up to a maximum of 6000x6000. (PRO Only!)
- In the Options section, determine which effects to apply during final export. (PRO Only!)
