

Features

Expression & Reshaping

One-Click Template Applying

- FaceFilter3's proprietary 3D muscle-based photo morphing technology is ideal for removing or altering unappealing expressions; improving face structure, symmetry; or simply slimming it down.
- Make instant facial sculpting with a single click. Embedded face transformation and expression templates allow you to quickly reshape facial features and create expressions.

Redefining Expression

- There are times when captured facial expressions are less than ideal, or you simply want to tweak it for a different feeling.
- Muscle-level facial morphing technology helps to maintain a natural expression.
- Apply subtle emotions or personality on your photos like happy, innocent, cool, or tender.
- You can combine templates to create unlimited combinations of expression.

Expression Template

Redefining Facial Features

- Blend facial features along with muscle expressions to revive youth or vitality. Reshape your face without going under the knife!
- Pre-made facial reshaping templates are based on analysis of structural differences in over 1000 faces.
- Various templates for facial shape or size, such as slim face, large eyes, misty eyes, or sexy lips.
- Layer templates to blend shaping results and create the perfect look.

Facial Features Template

Advanced Manually Adjustment

- After applying templates, further modify features with the slider to further balance your expression or facial features.
- Muscle-Based Retouching: Fine tune expression using muscle based manipulation such as raising an eyebrow, wrinkling the nose, or puckering the lips.
- Facial Feature Transformation: Use slider control to manipulate over 16 different facial features. Move, rotate and scale to transform features like brows, eyes, nose, mouth, and face shape.
