

Features

Skin Enhancement

Adjust Skin Color Tone

- Skin can be colorized and enriched while not affecting the rest of the image.
- Choose from various color tone templates to quickly balance back your skin tone to create a healthy, glowing or tanned look.
- Select a desired shade for the skin tone with the color palette or color picker tool. (PRO Only!)
- Slider adjust the Skin Tone level to determine the foundation color. (PRO Only!)

Dealing with Oily Skin

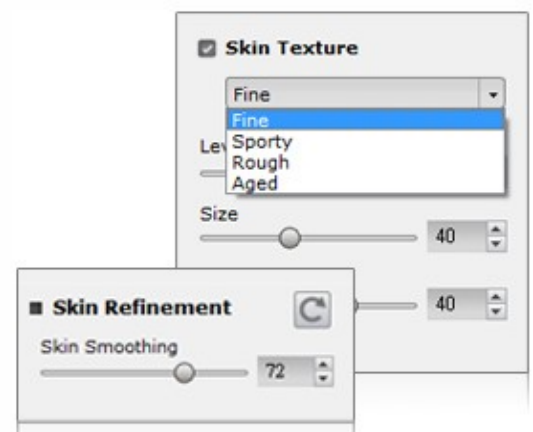

- Skin often looks oily when using the camera flash. The Skin De-oil feature provides a sheer foundation to tone down the shine.
- Instantly apply de-oil templates to remove glossy reflections, especially shine in the t-zone, cheekbones and chin.
- Increase the level value to strengthen the effect.

Smooth Skin with Texture

Skin smoothing

- The Skin Smooth setting preps your skin by refining the surface and evening out imperfections such as reducing wrinkles, lines, freckles, moles and birthmarks.
- Select a template with different smooth levels that best fits your skin condition for a foundation.
- To avoid a flawless, plastic-like appearance, the templates are blended with exquisite skin textures that help restore a natural look.
- Choose from a variety of texture patterns to be blended onto over-smoothed skin. (PRO Only!)
- Modify your own strength, deepness, and texture pattern size to match your face. (PRO Only!)

Eye Bag Reduction

- After the skin refinement and de-oiling steps, there may still be some imperfections under the eyes. For this, use the Eye Bag Reduction feature as a concealer.
- Apply eye bag reduction templates to automatically generate masks that cover eye bags and dark circles, providing a revitalizing look.
- Modify the strength value properly cover the area.

Neck & Shoulder (PRO Only!)

- Use the advanced Mask Tools to select areas other than the face.
- Determine the strength to conceal.
