

CrazyTalk

Talk, Shake & Slide to Animate

The CrazyTalk app packs all the animation magic of CrazyTalk in a one-of-a-kind, hand-held package that lets you animate like if you've never seen before! Slide your fingers to generate expressions, tilt your device to see your characters react, or shake to make them pop and sway. Then share your videos on YouTube, Facebook or through emails.

*Requirements: **iPhone 4, iPhone 4S, iPhone 5, iPod touch** (4th / 5th generation), **iPad 2 Wi-Fi, iPad 2 Wi-Fi + 3G, iPad** (3rd / 4th generation), **iPad Wi-Fi + 4G, iPad Wi-Fi + Cellular** (4th generation), **iPad mini** and **iPad mini Wi-Fi + Cellular**. Requires **iOS 6.0** or later.

*Language: English

Animation in the Palm of Your Hand

Tilt & Shake to Interact

Exploit your devices built-in sensors for ultimate control. Tilt in different directions to have your character follow and look-at you. Flick your wrist forward and backward to see your actor pop out. Gently shake from side to side to see your character sway. Shake up and down to bounce on the screen, or rock vigorously to go all out!

Up and Down

Left and Right

Front and Back

Gently Tilt

Intuitive Touch Character Animation

Naturally use one thumb to slide and swipe your character's facial expressions. Make use of the logically designed layout to accurately control specific facial movements. Drag two fingers down to slowly close your character's eyes or tap to make them blink.

One finger for expressions.

Use two fingers for blinking

Slide on different facial parts for corresponding movements

Auto Animate Actors with Your Voice

The audio lip-syncing engine animates any character with corresponding mouth shapes. With the Auto Motion technology, you can use your own voice energy to control the intensity of your animations.

Additional Tool

Unlimited Creations with CrazyTalk7

With CrazyTalk7 desktop, you will be able to create original characters from images or photographs, and later upload your CrazyTalk projects and actors to your iDevices to play and share with friends for real-time animation.
